

SLC DIGITAL × SPURIQ.AI

Two signals tested against live data.
Both **fired** – here are the **accounts**.

Every account below entered this list because a dated, public event put it there. Sources are named. Accounts that did not fire are shown too.

2

Signals validated against live registers, security press and hiring data

10

Named buyers produced, LinkedIn-confirmed

2

Compound triggers – new security leader plus live exposure

100%

Evidence sourced and dated, no inferred rows

Signal A – Documented account-takeover & withdrawal fraud

VALIDATED · 3 OF 5 FIRED

SIGNAL SOURCE

Security press

Company incident disclosures

Regulator settlements

Consumer complaint databases

Crypto/ CASP wallets

Refreshed weekly

- Consumer complaint databases
- App store review monitoring
- Leadership change tracking

Every account here was surfaced by a dated, public event – not a purchased list. Accounts that did not fire are shown, and are not sequenced.

Contacts are LinkedIn-confirmed. Email addresses resolve in a separate waterfall pass and are not send-ready until it completes. A third signal covering iGaming payout exposure was tested and is pending a scope decision from SLC.
